### 4. FIRST AID MEASURES

**First-aid Measures**

**Inhalation**

Remove victim to fresh air and keep at rest in a position comfortable for breathing. If effects occur consult a physician.

**Skin Contact**

Flush with copious amounts of water as a precaution. If skin irritation or a rash occurs, get medical advice/attention.

**Eye Contact**

Immediately rinse the contaminated eye(s) with lukewarm, gently flowing water for 15-20 minutes, while holding the eyelid(s) open. Take care not to rinse contaminated water into the unaffected eye or onto the face. Remove contact

lenses, if present and easy to do. If eye irritation persists, get medical advice/attention.

#### **Ingestion**

Wash out mouth with water. Remove dentures if any. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe.

#### **Most Important Symptoms and Effects, Acute and Delayed**

Non known.

#### **Immediate Medical Attention and Special Treatment**

##### **Special Instructions**

Treat symptomatically and supportively.

## **5. FIRE-FIGHTING MEASURES**

#### **Extinguishing Media**

##### **Suitable Extinguishing Media**

Water spray, carbon dioxide, dry chemical powder or appropriate foam.

##### **Unsuitable Extinguishing Media**

Non known.

#### **Specific Hazards Arising from the Chemical**

Exposure to combustion products may be a hazard to health.

#### **Special Protective Equipment and Precautions for Fire-fighters**

Evacuate area. Approach fire from upwind to avoid hazardous vapours or gases.

Before entry, especially into confined areas, use an appropriate monitor to check for: toxic gases or vapours, flammable or explosive atmosphere.

Fire-fighters may enter the area if positive pressure SCBA and full Bunker Gear is worn. If there is potential for skin contact with concentrated cleaner: chemical protective clothing (e.g. chemical splash suit) and positive pressure SCBA may be necessary. See Skin Protection in Section 8 (Exposure Controls/Personal Protection) for advice on suitable chemical protective materials.

## **6. ACCIDENTAL RELEASE MEASURES**

#### **Personal Precautions, Protective Equipment, and Emergency Procedures**

Follow safe handling advice and personal protective equipment recommendations.

#### **Environmental Precautions**

Discharge into the environment must be avoided. Prevent further leakage or spillage if safe to do so. Prevent spreading over a wide area (e.g. by containment or oil barriers). Retain and dispose of contaminated wash water. Local authorities should be advised if significant spillages cannot be contained.

#### **Methods and Materials for Containment and Cleaning Up**

Soak up with inert absorbent material. For large spills, provide diking or other appropriate containment to keep material from spreading. If diked material can be pumped, store recovered material in appropriate container. Clean up remaining materials from spill with suitable absorbent. Local or national regulations may apply to releases and disposal of this material, as well as those materials and items employed in the cleanup of releases. You will need to determine which

regulations are applicable. Sections 13 and 15 of this SDS provide information regarding certain local or national requirements.

**Other Information**

Report spills to local health, safety and environmental authorities, as required.

**7. HANDLING AND STORAGE**

**Precautions for Safe Handling**

When handling diluted product: no special handling precautions are necessary. Use only with adequate ventilation. Handle in accordance with good industrial hygiene and safety practice. Take care to prevent spills, waste and minimize release to the environment.

**Conditions for Safe Storage**

Keep in properly labeled containers. Store in accordance with the particular national regulations. Store separate from incompatible materials (see Section 10: Stability and Reactivity).
